

Banks/UofA Family and Community Medicine Partner Up For Health

Beginning, Tuesday, September 13, 2011, a really exciting partnership between the University of Arizona Family and Community Medicine and Banks Elementary School launches its first Mobile Health Program.

No appointment is needed and any community member may take advantage of this opportunity. Services include:

Prenatal Care
Primary Care
Health Screenings
Physical Exams
Immunizations
Well Woman checks and Paps
Child Physicals
Resource Information
Health and Nutrition Education

Donations are accepted, but this is mainly when lab fees are to be a necessity.

This is a great opportunity for our Westside community. Let's use it so that the U of A sees that we have the need and the will to fill that need when it is available.

When: 1-4 PM, the Second and Fourth Tues. of each month.

Where: Banks Elementary School.

Contact: Mobile Health Program 349-6594
